

Motions That Were Not Confirmed - *Follow the Procedure*

Justice Grace has asked us to share the following important information:

The court is being inundated with requests that motions that were not confirmed on time be added to the Friday list. After receiving a negative response, Courthouse staff have been told by some lawyers that they'll join the call and make the request anyway.

The Region's practice direction could NOT be more clear on this issue:

Applications and Motions

Motions that have not been confirmed will NOT be heard and requests that the matter be added will NOT be entertained.

If a matter is believed to be urgent, counsel can comply with my most recent memorandum and make a request that it be heard in the manner stipulated. Justice Grace will triage that request. If Justice Grace agrees the matter is urgent, arrangements to hear it will be made but under NO circumstance will motions that have not been confirmed in a timely manner be added to the Friday list from which such motions have been removed.

No one is to try and circumvent the practice direction or this reminder.
